Why Online Classes has a high demand now-a-days?
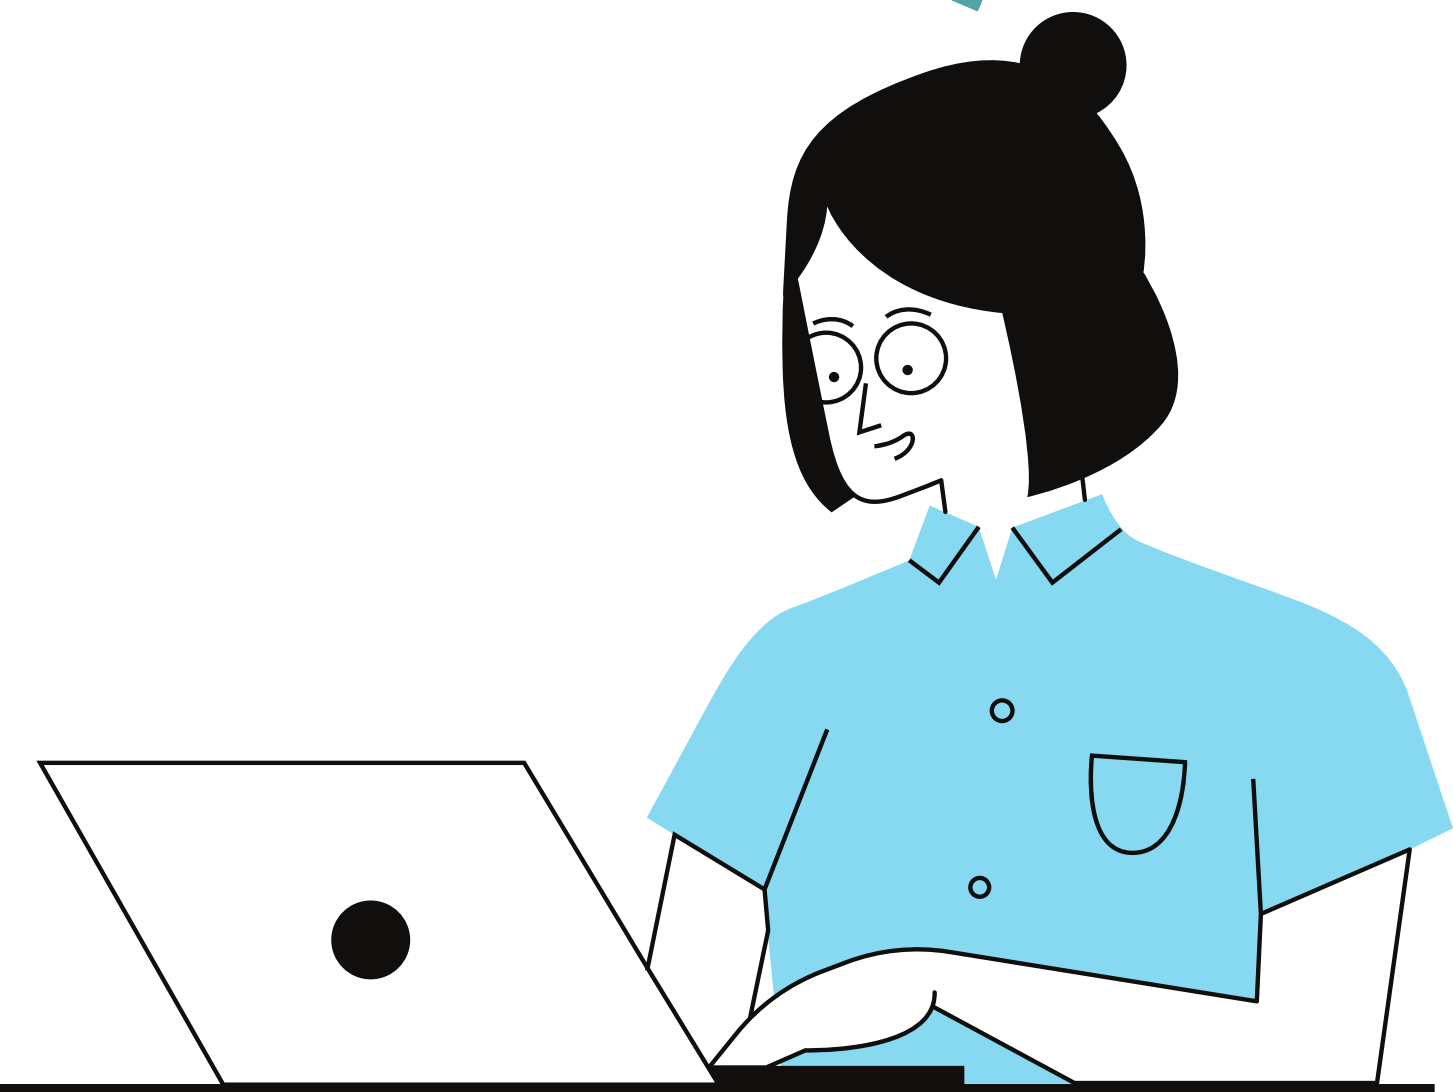

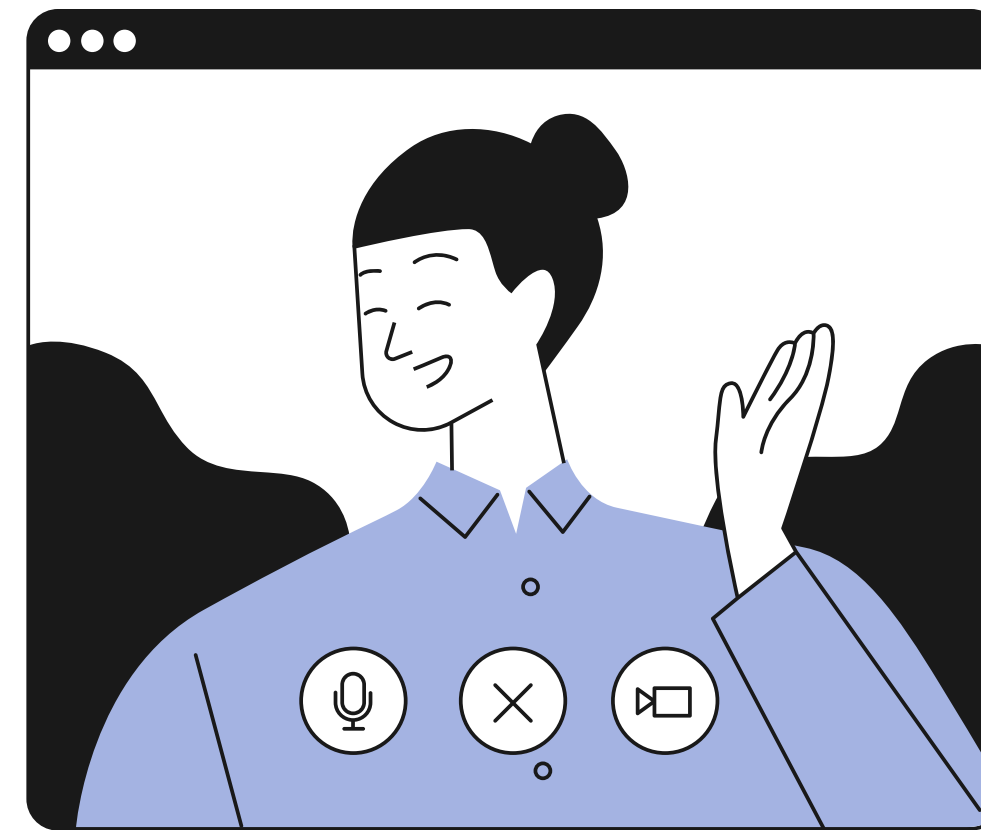

- The coronavirus outbreak has resulted in schools and universities shut down al across the globe, leading to escalation of the need of online methods of teaching.

- Whether it is language apps, virtual tutoring, video conferencing tools or online learning software, there has been a significant surge in usage since COVID−19. Online learning can play an immensely important role if the idea is executed with precision.

- Virtual school market is expecting a growth of almost 30%, as this approach to learning has been proven effective.

Advantages Of Online Class

- **Accessibility Of Time And Place**

- **Affordable to all user**

- **Reduced financial costs**

- **Paperless learning environment**

- **Fewer chances of students missing out on lessons.**

Disadvantages Of Online Class

- **Lack of communicational skill development**

- **Procrastination**

- **Lack of Self-Motivation**

- **No one-on-one attention**

- **Causes self isolation**

- **No social engagement**

- **Absence of attention**

Students' review on Online Classes

From a students's point of view, there's a huge diffrence between E-learning and Offline learning, which are:

- Lack of personal touch and mentorship between the students and the teacher.

- Absence of practicality resulting in uncleared doubts and a poor grip on topics.

- There is no proper courses of action to showcase your work to multiple people precisely.

So we have come up with a solution which end all our problems we face

#MEET

By YUKTI GROUP.

A New Era Of Online Classes

A New Generation of Online Classes

01 Build one-on-one attention

02 Help in motivating Students

03 Personality development

04 Social Engagement

05 Supporting struggling students

06 AI bots and personal doubts clarification

07 Theme that aware Mental Health issues

08 Rank up system

Build One-on-One attention

- Student can interact with their respected lectures easily.

- Face-to Face communication should be given preference.

- Separate chat rooms are created for each subjects, so that they will be a direct path to students and also for lectures to communicate easily.
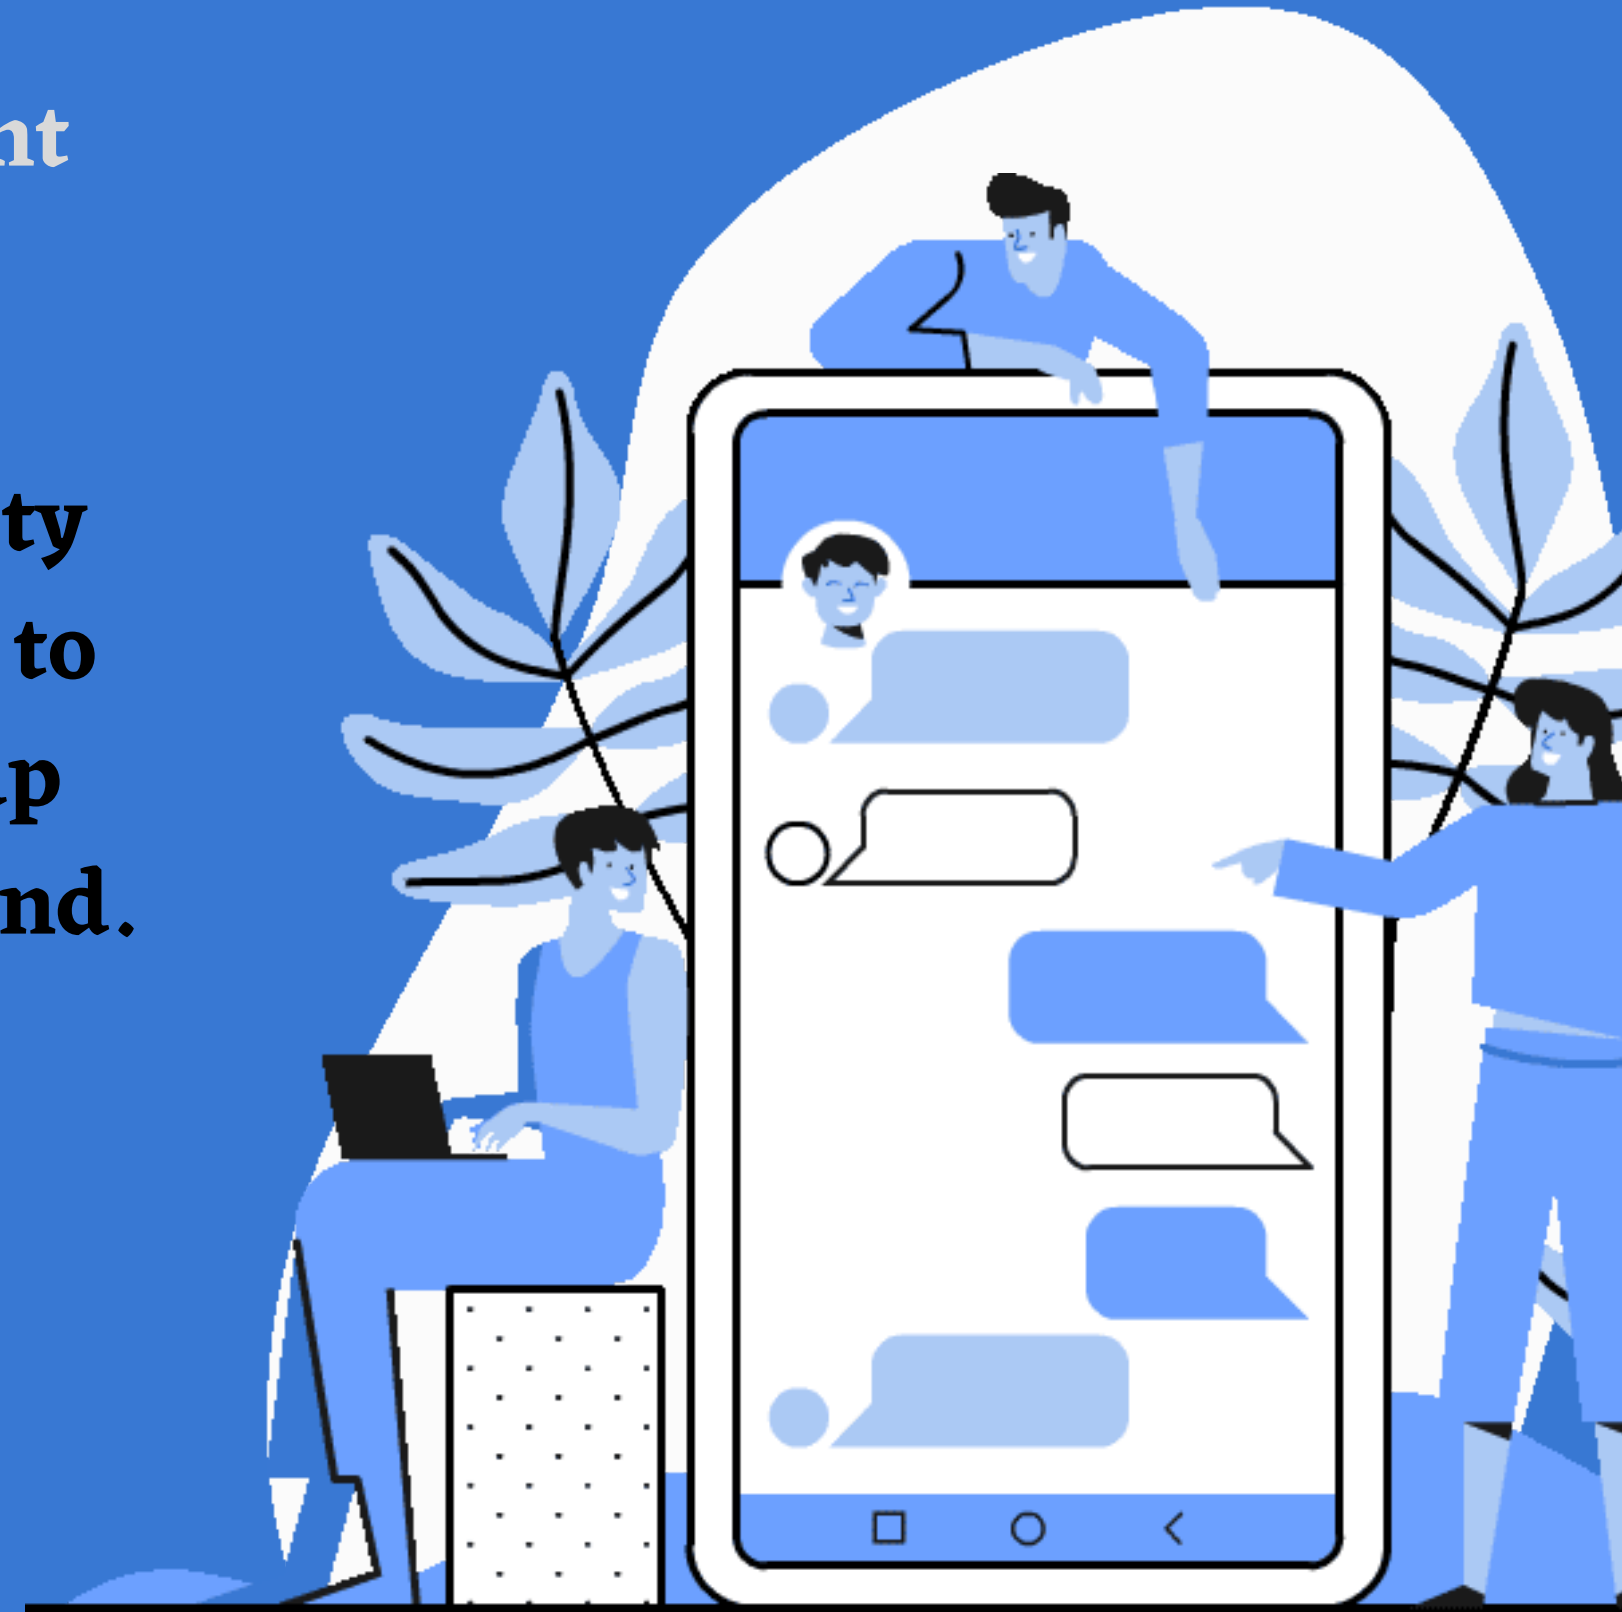

Help in motivating students.

Wondering how to motivate students?

- **A pop-up messages of small motivational quotes, cheering up messages will be shown to boost the student to hear the lectures and maintain positivity till the end**.

- **This also prevent students to procrastinate and be more attentive during the online classes.**

- **At the end of the session, a victory symbol will be shown off to the students.**

Personality Development and Social Engagement

- As there is no engagement and self development during online classes.

- A feature called Group discussion or personality development sessions, where students are able to speak up which helps in softs skills, building up personality and create social engagement around.

- It can improve self-esteem, develop a sense of gratitude and provides a constant source of motivation.

Supporting struggling students

- Students are weak in some subjects which they can't cope up parallelly.

- So the prerecorded classes will be automatically be restored and gets saves in the respective subjects sections.

- In this student can watch the lectures again and also clarify their doubts in the respective subjects section.

- Conducting personal doubts clarification, to avoid hesitation and awkwardness that most of the students suffer from.

A.I bots and personal doubts clarification

Of course students will have doubts to be clarified but always miss the chance to do so.

Don't worry!

AI bots and also your respective teachers can get your doubt clarified anytime.

Now its a lot easy for you to be free with doubts.

Rank up system

This can be the real gamechanger in online classes which makes our idea stand apart.

- **Being GEN-Z, we always expect more from even the smallest of small things, it is a pretty difficult task to keep up with 3-4 hours of continuous classes without getting exhausted. This system can be a gold mine in the world of online learning.**

- **So we introduce Rank up system, where students earn up points(XP) similar like gaining experience.**

- **By attending classes, submitting assignments, classworks, projects they gain points(XP).**

What makes our idea unique?

- *The rank-up system includes gamification which can help increase student engagement, here the students will be awarded points (XP) for attending classes.*
- *Prior submission of assignments, projects, or homework will fetch them bonus points.*
- *If a student attends a class for three straight days, a star emoji will be displayed next to their name alongside a number indicating how long they have been attending the classes, uninterruptedly.*
- *Spellbinding contrast colour schemes, to seek more concentration from students and to trigger positive emotions.*
- *One-liners vis-à-vis self-care and motivation, messages like such will boost the students and will to hear the lecture till the end and stay attentive throughout the session.*

Theme that aware Mental health issues

We also do care about the people who suffers from mental health issues.

- **According to recent studies, specific colors can really help in reducing stress, depression, anxiety and help in also doing creative and productive things.**

- **Providing default eye-catching color scheme to influence positive affirmation among students.**

- **Adding mental health helpline numbers to the page, which can help both learners and lecturers to keep up with their mental health.**
